

USTREAM Align

Engage your employees with secure video. Ustream Align makes it easy to deliver town halls, trainings and departmental communications to employees everywhere.

Protect your message

Make sure your employees are the only ones watching your stream.

✓ 2-step authentication

Employees with your email domain will be able to sign up to view your town hall via a quick 2-step email verification.

✓ Federated login control

We can integrate with your corporate access control system using the SAML standard. Contact us for details.

✓ Password Protection

Protect your stream with a password.

✓ Domain Controls

Enable embedding on your own intranet only.

✓ IP Filtering

Add an extra layer of security and filter out IP addresses that don't belong to your company.

✓ Geo-Block

Only want west coast offices to have access to your broadcast? You can easily geo-block to ensure this is the case.

Select your audience

Set-up a channel that every one in the company can access, confidentially.

- ✓ Add key partners, advisors or agencies, securely.
- ✓ Limit to a specific team of employees.

Secure enterprise portal

Make sure your employees are the only ones watching your stream.

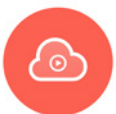

- ✓ Hosted in the cloud, no set-up required.
- ✓ See a schedule of upcoming events.
- ✓ Find previously recorded streams you may have missed.
- ✓ Upload videos to educate and inform your team.
- ✓ Search and sort through your video library.

Scalable

As your business scales, your video solution does too.

- ✓ Set up unique channels for different groups within your organization.
- ✓ Enable multiple administrators for your account.
- ✓ Start with one team, and scale with your organization.
- ✓ Reach people in the field, securely.
- ✓ Assign appropriate security levels for each group.

Network Optimization

Don't weigh down your corporate internet connection. Our experience with network optimization allows everyone to watch your stream in HD without crashing your network.
